Malang, East Java | +62 81339594916 | johanesbernard26@gmail.com | LinkedIn | Website

Summary

Aspiring Data Engineer with a solid foundation in data analytics and management and business process automation. Currently a final-year Information Systems student at Universitas Brawijaya with diverse hands-on experience in designing data pipelines, building machine learning models for customers response prediction, and developing digital solutions for enterprise systems. Proficient in SQL, Excel, Python, PHP, Data Visualization tools, and Machine Learning algorithms with recent projects ranging from predicting customer's marketing segmentation reports to transforming the end-to-end digital workflow for a lecturer certification system. Passionate to learn about digital ads, solving data problems, applying AI for automation, and collaborating across dynamic teams to deliver data-driven automation for enhancing productivity workflows in business, ed-tech, and digital marketing industries.

Experience

Laboratory Teaching Assistant Malang
Faculty of Computer Science Feb – Dec 2024

- Facilitated Database Administration with IBM DB2 and Advanced Programming with Java coursework weekly lab session to over 75 students, covering more than 20 topics including database management and object-oriented design to ensure data integrity and security.
- Achieved students average final score at 90 plus by created materials with more than 10 lecture presentations, designed 3 sets of HackerRank-based practice & exams, and assist minimum 2 plus weekly hands-on lab sessions. [**Link**]

Education

Universitas Brawijaya Malang
Majoring in Information Systems – **GPA: 3.79** out of 4.00 Aug 2022 – Present

- Relevant Coursework: Advanced Programming, Basic Database, Business Process Modelling, Capstone Project, Database Administration, Data Analysis, Data Warehouse, Digital Transformation Strategy, Enterprise System, Statistics, Web Programming. [**Link**]

Project

- **Marketing Analytics by Segmenting & Predicting Customer Behaviour**, Self Project, [**Link**], 2025
  Built customer segments with profiling by using RFM and K-Means, then preprocessing the data to predict campaign performance response, with 96% accuracy's result. Delivered insights via a dashboard, model deployment, and recommended promotional strategies.
- **Home Credit Scorecard Model**, PBI: Data Scientist - Home Credit Indonesia x Rakamin Academy, [**Link**], 2025
  Developed a credit risk model using machine learning which selected Random Forest for 95.55% accuracy and delivered strategic insights to improve loan approval processes.
- **Sales Trends EDA**, RevoU Data Analytics Mini Course Batch Feb. 2025, [**Link**], 2025
  Conducted trend analysis on time-series sales data, interpreting patterns for high-performing promotional products and pricing decisions.
- **IDFOOD**, Enterprise System Coursework, [**Link**], 2024

Implemented an integrated enterprise system using Odoo (Sales, Inventory, Manufacturing, & Purchase modules) to optimize sales and distribution that can streamline supply chain management and improved operational efficiency to support business expansion.

- **Klinik Sehat**, Web Programming Coursework, [**Link**], 2024
  Klinik Sehat is a web project that streamlines patient and doctor interactions through CRUD operations which include doctor schedules, medical records, payments, and prescription management. The MVC system also provides clinic information and user authentication.
- **ETL Pipeline Streamline,** Data Warehouse Coursework, [**Link**], 2024
  Developed a data warehouse using Talend Open Studio that managing and optimizing OLAP cubes and multidimensional models for product sales retail store to support sales reporting.
- **Exploring Superstore Sales using Tableau**, Dibimbing.id BI Live Class, [**Link**], 2024
  Created an interactive dashboard to visualize sales, profit, and shipping trends that can support business recommendations for inventory and regional strategies.
- **Database Fitness Center**, Basic Database Coursework, [**Link**], 2023
  Database Fitness Center is a relational database project for managing gym members, trainers, plans, and equipment, with ERD, schema, SQL scripts, and queries for demographic insights.

Achievement

Favorite Winner – IS Capstone Project Malang
Faculty of Computer Science Jun 2025

- Served as the core analyst and researcher in building a structured lecturer certification system design, including ERD modeling, role-based logic, digital transformation roadmap, and also the user's manual documentation with the tutorial video to sustain the digital system usage. [**Link**]

Organizational Experience

Expert Staff Malang
Eksekutif Mahasiswa DSI Mar 2023 – Feb 2024

- Led the development of the first version of the KBMDSI website as Project Manager and UI/UX Designer by applying agile methodology and Figma to deliver user-centered designs within a four-month sprint, achieving 70% satisfaction rate based on feedback from dept. students [**Link**]
- Coordinated and facilitated 3 department-wide major events with more than 100 attendees to ensure smooth operation and boosting student engagement and outcomes. [**Link**]

Volunteer Experience

Public Relations Malang
MMD FILKOM UB Jul – Aug 2024

- Assisted local UMKM and village agrotourism by creating e-commerce and social media accounts, designing promotional content, and developing branding materials such as logos, banners, and tickets. [**Link**]

Course and Certification

- Linear Models in Machine Learning: Fundamentals by PPTD Komdigi, [**Link**], 2025
- Data Analytics Essentials by Cisco Networking Academy, [**Link**], 2025
- Certificate of Achievement - Home Credit Indonesia Data Scientist Project Based Internship Program by Home Credit Indonesia, [**Link**], 2025
- Intro to Data Analytics - Mini Course by RevoU, [**Link**], 2025

- SQL (Advanced, Intermediate, Basic) by HackerRank, [**Link**], 2024 – 2025
- Python, SQL, Data Science, Visualisasi Data Course by Dicoding, [**Link**], 2024

Skills and Language Proficiency

Data & Technical Skills: Proficient in SQL, Excel, Python, PHP, Looker Studio, Machine Learning algorithm(scikit-learn), Data Cleaning & Processing, Data Analysis, Data Visualization(Power BI, Tableau), ETL & Data Warehouse, Streamlit, GCP Firebase, Java, Laravel, IBM DB2, draw.io, Figma.
Analytical & Business Skills: Business Intelligence, Business Analysis, Business Process Modelling, Big Data Analytics, Problem Solving, Presentation Skills, Software System Analysis.
Interpersonal Competencies: Teamwork, Communication, Critical Thinking, Leadership.
Language Proficiency: Indonesian (Native), English (Advanced).
